

OUR VALUES

Safety// We are proactive in taking steps to encourage and ensure a culture of safety in all our operations. Taking care of our people is important to us and results in peace of mind across the board—from staff, management, and clients.

Integrity// Integrity is an integral part of all our internal and external relationships. We believe that if we are open and honest in our communications and we carry out all operations with integrity, this will be evident in the work that we produce, our company's profitability, and ongoing customer relationships.

Excellence// Integrity leads to excellence. We believe that skilled tradesmen who are dedicated achieve great results and this is the standard that we seek to uphold. We also believe that through using the right systems to control our process, we can ensure consistent quality management.

Innovation// For us, innovation is the way forward. Building on a foundation of integrity and excellence, we make progress as an innovative company. To do that, we must continually assess and improve at every step and we owe it to our clients in endeavoring to offer the smartest solutions.

We are a passionate team of stainless steel engineering specialists, constantly seeking improvement through innovation. We believe our repeat business and continued growth is testament to our work ethic.

Our 40+ years of experience in the high-end housing industry has seen us complete numerous projects for a wide range of clients. It also means we are not limited to stainless steel alone; we work with aluminium and galvanized steel to produce flashings, internal gutters, rainheads, brackets and powder-coated finishes. We relish the challenges of engineering and customers appreciate our innovative, pragmatic approach and our commitment to get the perfect job done.

Our domestic fabrication experience includes (but is not limited to):

- Handrails
- Shower trays
- Tiled shower drains
- Beams (structural steel)
- Lintels (mild steel)
- Flashings
- Tile edging
- Glass fixings
- Range hood covers
- Splash backs
- Benching

We are also an agent for Alloy Design wall tiles.

SPECIALISED TRADESPEOPLE

The combined experience and knowledge of the Superior Stainless team is extensive and covers a broad range of engineering expertise. All of our trades staff are fully-trained, time-served industry tradespeople, who are professional and passionate about their work and outputs. We make it our business to ensure that we are always up to date with best practices and our benches are meticulously polished by our specialist polishers, who ensure a consistently high level of finish across the board.

BENCH PROFILES

PROJECT MANAGEMENT AND INSTALLATION

We take full ownership at every stage of the process and our point of difference is our commitment to take a job from conception to completion, from the design and draughting stage, through to fabrication and site installation. Our in-house draughting team work closely with local design and engineering companies, ensuring that all work carried out is correct first time. We take a genuine interest in our clients' projects and when it comes to installations are competent and careful. We like to see a job well done, and maximising our clients operational up-time.
